

Logistics Management

Offering a wealth of experience both in mine operation and in servicing the many needs of mining companies, SADA prides itself on being proactive in response to client requirements, with a quick decision making process born from years in the business. We understand projects from our clients' perspective and draw on our own knowledge and experience to think beyond the immediate and deliver trouble-free, seamless, integrated solutions on every project we undertake.

Logistics Management

SADA has extensive experience in logistics management in the coal industry, with our management team offering over 40 years experience in the transport of coal from mine to port.

Currently managing the movement and blending of over 2.3 million tonnes of coal from pit to port, SADA has become a valued logistics partner for many major mining companies.

Our extensive transport and handling capabilities allow SADA to easily handle even the largest road and rail freight volumes, while our first-hand and extensive coal industry experience makes us the trouble-free choice for stockflow management, coal blending and stringent quality management.

Combined with our long-term experience in dealing with document preparation, ports and shipping agencies, enlisting SADA for your logistics needs can ensure plain sailing in the transport of coal from pit to port and beyond.
